Kitchener, ON | +1 (382) 885-5521 | tirthpatel1617@gmail.com | linkedin.com/in/tirth-patel-7a38501a0

PROFESSIONAL SUMMARY

IT graduate with hands-on expertise in system administration, network infrastructure, and cloud technologies. Proven ability to design and deploy enterprise solutions using Windows Server, Linux, Active Directory, Docker, and security monitoring tools. Strong troubleshooting skills with experience in high-pressure operational environments.

TECHNICAL SKILLS

Operating Systems: Windows Server, Linux (Ubuntu, CentOS), Active Directory
Cloud & Virtualization: Docker, Apache Guacamole, Multi-site Server Deployment
Security & Monitoring: Wazuh, Zabbix, VPN Configuration, Security Controls
Collaboration & Database: Nextcloud, MySQL, Domain Configuration
Networking: VPN Network Connection, Remote Access Solutions
Programming: Python, C

EDUCATION

Postgraduate Diploma, Network and System Administration May 2024 – Aug 2025
Conestoga College, Kitchener, ON
Bachelor of Computer Application Aug 2020 – May 2023
Ganpat University, Gujarat, India

TECHNICAL PROJECTS

Enterprise Infrastructure Deployment Conestoga College

- Designed and implemented multi-site server infrastructure using Windows Server and Linux environments
- Configured Active Directory for centralized domain management and user authentication across networks
- Deployed VPN solutions enabling secure remote access for distributed teams
- Integrated Nextcloud for enterprise collaboration and file-sharing capabilities

Security Monitoring and Compliance System Conestoga College

- Implemented Wazuh SIEM for real-time security monitoring and threat detection across infrastructure
- Configured Zabbix for comprehensive system performance monitoring and alerting
- Established security controls and compliance protocols for enterprise environments
- Deployed Apache Guacamole for clientless remote desktop access

Containerized Application Deployment Conestoga College

- Orchestrated Docker containers for scalable application deployment and management
- Configured MySQL databases with optimized performance and backup strategies
- Automated deployment processes for consistent and efficient infrastructure provisioning

PROFESSIONAL EXPERIENCE

Warehouse Associate – Amazon DSP Sep 2025 – Present
St Thomas, ON

- Execute high-volume inventory management with 99%+ accuracy using warehouse management systems
- Operate handheld scanners and warehouse software for real-time inventory tracking
- Collaborate with cross-functional teams to optimize workflow efficiency during peak operations
- Train new associates on processes and quality control standards
- Demonstrate reliability and discipline in fast-paced, deadline-driven environment

Line Cook – Swiss Chalet Feb 2025 – Present
Cambridge, ON

- Maintain quality standards while managing multiple tasks in high-pressure environment
- Coordinate with kitchen team to ensure efficient service during peak hours
- Monitor inventory and maintain organized workspace adhering to safety protocols

Process Associate – Viaan Solution LLP Oct 2023 – Mar 2024
Ahmedabad, Gujarat, India

Student Intern – Royal Infotech Solution Jan 2022 – Apr 2022
Ahmedabad, Gujarat, India

- Developed applications using Python and C programming languages
- Completed multiple project assignments demonstrating problem-solving capabilities
