PROFESSIONAL SUMMARY

IT graduate with hands-on expertise in system administration, network infrastructure, and cloud technologies. Proven ability to design and deploy enterprise solutions using Windows Server, Linux, Active Directory, Docker, and security monitoring tools. Strong troubleshooting skills with experience in high-pressure operational environments.

TECHNICAL SKILLS

Operating Systems: Windows Server 2019, Linux (Ubuntu, CentOS, Rocky Linux, Red Hat), Active Directory

Cloud & Virtualization: Docker, Apache Guacamole, VMware vSphere, Multi-site Server Deployment

Security & Monitoring: Wazuh SIEM, Zabbix, VPN Configuration, Security Hardening, LDAP Administration

Collaboration & Database: Nextcloud, MySQL, MariaDB, Microsoft Exchange Server, Gitea, Redmine

Networking: DNS, DHCP, VPN, RDP, Apache Load Balancer, Reverse Proxy, Network Configuration

Programming: Python, C

EDUCATION

Postgraduate Diploma, Network and System Administration

Conestoga College, Kitchener, ON

May 2024 – Aug 2025

Bachelor of Computer Application

Ganpat University, Gujarat, India

Aug 2020 – May 2023

TECHNICAL PROJECTS

Enterprise Virtual Infrastructure Implementation (LA & Singapore)

May – Aug 2025

- Configured domain controllers (NetcoreX.local) across two international sites with secure VPN connectivity
- Deployed enterprise applications: Nextcloud (collaboration), Wazuh (security monitoring), Zabbix (system monitoring), Gitea (repository), Redmine (ticketing), Exchange (mail server), MySQL (database), and Headwind MDM
- Integrated all tools with LDAP/Active Directory Domain Services for centralized authentication
- Implemented containerized applications using Docker for portability and rapid provisioning
- Established security hardening, monitoring alerts, and system health verification across both environments

Apache Guacamole Remote Access Platform with Reverse Proxy

Jan – Apr 2025

- Deployed Guacamole servers on Ubuntu and Rocky Linux with source compilation and guacd service configuration
- Configured Tomcat 9 for Guacamole web client execution and MySQL backend for persistent authentication
- Integrated Guacamole with Active Directory via LDAP for domain authentication and group-based access control
- Established RDP connections to Windows servers and clients with session access across both Guacamole nodes
- Implemented Apache reverse proxy and load balancer ensuring failover capability between Node 1 and Node 2
- Reconfigured IP addressing, DNS records, and reverse proxy settings for complete operational deployment

Nextcloud Authentication with Active Directory and LDAP

Jan – Apr 2025

- Installed Nextcloud on Ubuntu Server with integration to Windows Domain Controller for authentication
- Configured Apache, PHP, and MariaDB for secure web access and database management
- Joined Ubuntu and Windows client machines to Active Directory for cross-platform authentication testing
- Enabled Remote Desktop Protocol (RDP) for remote administration and verification
- Validated user access, file sharing, and secure data transfer between domain-joined clients

Disaster Planning Multi-Domain Global Infrastructure

Sep – Dec 2024

- Deployed dedicated domain (core.local) infrastructure using Windows Server with ADDS, DNS, and static IP configuration
- Organized organizational units, security groups, user accounts, disk partitions, file shares, and mapped network drives
- Configured conditional forwarders and established cross-domain trust relationships for multi-site communication
- Implemented Group Policy Objects (homepage restrictions, network access controls) with domain-wide replication testing
- Established disaster recovery procedures with centralized backup drives and comprehensive network backup policy

PROFESSIONAL EXPERIENCE

Warehouse Associate – Amazon DSP

St Thomas, ON

Sep 2025 – Present

- Execute high-volume inventory management with 99%+ accuracy using warehouse management systems
- Collaborate with cross-functional teams to optimize workflow efficiency during peak operations

Line Cook – Swiss Chalet

Cambridge, ON

Feb 2025 – Present

- Maintain quality standards while managing multiple tasks in high-pressure environment

Process Associate – Viaan Solution LLP

Ahmedabad, Gujarat, India

Oct 2023 – Mar 2024

Student Intern – Royal Infotech Solution

Ahmedabad, Gujarat, India

Jan 2022 – Apr 2022

- Developed applications using Python and C programming languages demonstrating problem-solving capabilities
